Self-adjusting clutches are recommended for trucks with hydraulic linkage to reduce the risk of drivetrain damage.

**Estimated shipping weights:** 15.5” = 150 lbs, 14” = 110 lbs

*New part numbers September 2016*
Choose clutch torque. Rating in chart must be equal to or exceed engine torque rating.

- **New**
  - Solo®
  - Manual Adjustment
- **Rearranged**
  - Solo
  - Manual Adjustment

**Severe Service**: A combination of higher plate load, super buttons, or an additional number of facings. United States and Canada only.

**Two Plate Clutches**: Fits in place of single plate (pull type), however, this increases inertia to the transmission and may affect shiftability and longevity.
